The following RFID enabled SmartDevices complement and enhance the LibRAIN Library Management software:

Stock Code	Product Name	Description
STMT086	ManTag	Credit card type RFID enabled tag for the management of personnel and patrons. Details such as photos, text and barcodes can be printed on the cards in black and white or colour (Can be supplied pre-printed or can be printed on-site with a RFID card printer).
STLT091	LibTag	RFID tag for the tracking and management of library books.
SACU042	SmartActivator Counter Unit (non rugged)	A non-rugged RFID enabled desktop device used to complement and enhance the circulation process of RFID enabled library books.
SKL063	SmartKiosk Library (Conversion Station)	SmartKiosk Library is a self-contained work station set up to enable the conversion of normally barcoded library books to RFID so that they will operate successfully within the overall RFID solution. In this configuration the unit has the ability to be wheeled to wherever it is needed within a library.
SIH071	SmartInterrogator	A hand-held reader that collects data and other information programmed into the RFID tag, The information can then be passed on or downloaded via optional connectivity methods to the main management system. The device also enables the user to read 2D barcodes.
SPL039	SmartPortal Library	A purpose-built frame for deploying at library exits that is fully RFID-enabled and integrated with the LMS, it is used to collect and monitor data from tags passing through the exit point. The portal is equipped with an exit gate with a maglock to prevent unauthorized movement of books.
SPL039C	SmartPortal Library (Compact)	A purpose-built compact frame for deploying at smaller library exits that is fully RFID-enabled and integrated with the LMS, it is used to collect and monitor data from tags passing through the exit point. The portal is equipped with an exit gate with a maglock to prevent unauthorized movement of books.
